## Work Experience

---

### **Associate Systems Engineer**

Dycom Industries, Inc - Boynton Beach, FL

June 2023 to Present

In my role my team and I work on a diverse set of projects and maintain the infrastructure for our company. I work closely with Developers, DBAs, and Security teams to build, monitor, and automate various aspects of the company. I leverage tools like Terraform, Jenkins to construct and maintain CI/CD pipelines, automating the testing, building, and deployment of software applications. In my role I also work heavily in the AWS cloud leveraging the various products to implement solutions to our businesses requirements. EC2, ECS, Lambda, among many others are my specialties, I pride myself in finding cost savings, integrations, and automating tasks for these resources. I also am well versed in Windows Server 2016, 2019 and many flavors of Linux Servers. My team and I have completed various projects ranging from onboarding new SaaS software, migrating servers with EOL Operating Systems, onboarding ERP software to the enterprise. The process I am proudest of is managing our rapid response and RCA efforts in order to ensure all outages are triaged as soon as possible and have deep root cause analysis's to ensure issues don't arise again.

### **IT Support Specialist**

Dycom Industries, Inc - Boynton Beach, FL

October 2022 to June 2023

Working at a helpdesk where our team provides support through various channels to users who need assistance with software, hardware, or general questions. We work as a team to handle all issues that come through in a quick and efficient manner. I am in the 20/20 program which lets me work part time at Dycom while working full time at school. This opportunity gives me relevant work experience while I pursue my degree in Computer Programming.
